

GORAKH SHELKE

Senior React & Full Stack Engineer | React.js, Next.js, TypeScript, Laravel, AWS

Phone: +91-9096302613 | sachinshelke28@gmail.com | <https://linkedin.com/in/gorakh-shelke-49218096>

PROFESSIONAL SUMMARY

Results-driven **Senior Full Stack Engineer with 11+ years** of experience designing, developing, and scaling enterprise-grade SaaS platforms, multi-tenant applications, and high-performance web systems. Strong expertise in **React.js, TypeScript, Laravel, Node.js, Python, AWS** and scalable backend architecture.

Proven track record of building large-scale multi-tenant systems serving 1,000+ customers and powering 150+ production applications. Experienced in performance optimization using Laravel Octane, Redis caching, queue-based processing, WebSockets, and database tuning.

Skilled in end-to-end product development including backend architecture, REST/GraphQL APIs, frontend engineering, DevOps workflows, CI/CD automation, and real-time application development. Adept at leading engineering initiatives, mentoring developers, conducting code reviews, and delivering scalable production-ready systems.

KEY HIGHLIGHT

- 11+ years of experience in Full Stack Development
- Architected scalable SaaS platforms serving 1,000+ customers
- Developed and maintained 150+ production web applications
- Improved API performance by 40% to 60% using Laravel Octane and Redis
- Reduced API response time from 300ms to 120ms on critical endpoints
- Built reusable React component libraries reducing frontend effort by 35%
- Developed real-time systems supporting 5,000+ concurrent users
- Automated deployment pipelines reducing release cycles by 40%
- Expertise in scalable backend systems, microservices-style architecture, and real-time communication
- Strong experience in mentoring teams and defining engineering standards
- Basic knowledge of Python for scripting, automation, and backend development tasks.

CORE SKILLS

- **Backend:** Laravel (Octane, Eloquent, Queues, Events, Artisan), Node.js, REST APIs, GraphQL, Python (Basic)
- **Laravel Ecosystem:** Eloquent ORM, Query Optimization, Relationships, Indexing
- **Frontend:** React.js 18, Next.js, TypeScript, JavaScript (ES6+), JQuery, HTML5, CSS3, Tailwind CSS
- **State Management:** Redux, Redux Toolkit, Context API, React Query (TanStack Query), List Virtualization
- **Performance:** Laravel Octane (Swoole), Redis Caching, Lazy Loading, Memoization, Virtualization
- **Queues & Systems:** Queues (Redis), Jobs, Workers, Events, Listeners, Scheduler, Cron Jobs
- **Real-time Systems:** WebSockets, Event-driven architecture, Live updates
- **Media Optimization:** Imgix (CDN, dynamic resizing, WebP/AVIF formats)
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **DevOps:** Docker, AWS (EC2, S3, RDS PostgreSQL, Route 53, IAM, SES, CloudWatch), CI/CD, Git, Linux
- **AI Tools:** Cursor AI, LLM-based development workflows, Prompt Engineering
- **Testing:** Cypress, Jest, Mocha, E2E & Integration Testing
- **Methodologies:** Agile, Scrum, TDD, Code Reviews, Technical Documentation, Mentoring

PROFESSIONAL EXPERIENCE

SynerGenie Solutions | Senior Software Engineer (Laravel + React + AWS) | Jan 2020 – Apr 2026

- Architected multi-tenant Laravel platform delivering 150+ production websites to 1,000+ customers.
- Implemented Laravel Octane (Swoole), cutting API response time from ~300ms to ~120ms.
- Built Redis queue-based async processing (Jobs, Workers) to handle high traffic efficiently.
- Designed event-driven architecture (Events, Listeners, Broadcasters) for modular workflows.
- Optimised Eloquent ORM queries and DB indexing, boosting backend performance by 35–45%.
- Developed real-time WebSocket features (Laravel Echo + Pusher) supporting 1000+ concurrent users.
- Designed multi-tenant React + TypeScript frontend architecture for core platform and admin interfaces.

- Built reusable React component library, reducing cross-team development time by 35%.
- Integrated GraphQL and REST APIs via React Query for cache-aware, performant data fetching.
- Optimised media delivery using Imgix CDN (WebP/AVIF), improving page load performance site-wide.
- Worked with **AWS cloud services** including **EC2, S3, RDS PostgreSQL, Route 53, IAM, SES**, and CloudWatch for application deployment, storage management, database hosting, DNS routing, monitoring, and infrastructure management.
- Integrated Stripe and PayPal APIs with robust error handling and webhook verification.
- Automated CI/CD pipelines, reducing release cycles by 40% and eliminating manual deployments.
- Mentored and guided a team of 4 engineers through code reviews, pair programming, and technical discussions.

SynerGenie Solutions | Software Engineer - Full Stack (Laravel + React) Apr 2016 – Dec 2019

- Developed scalable backend APIs and frontend features for CMS and data-intensive SaaS products.
- Migrated legacy JavaScript codebase to React Hooks and TypeScript, improving.
- Integrated APIs in multiple modules and ensured reliable data flows between frontend and backend services.
- Collaborated with product and design teams to deliver responsive, user-friendly interfaces meeting accessibility standards.
- Contributed to initial CI/CD pipeline configuration and deployment automation for the engineering team.

Aloha Technology Pvt Ltd | Software Developer | Jan 2015 – Mar 2016

- Developed backend APIs and services for enterprise applications
- Integrated APIs across 40+ external systems
- Improved system reliability through testing and validation

KEY PROJECTS

Vahara CMS - Multi-Tenant SaaS & E-Commerce Platform (React, Laravel) <https://www.vahara.com>

- Built scalable Laravel backend + React frontend powering 150+ websites; dynamic page builder, multi-tenant routing, role-based access control.

CarKeta - Automotive Intelligence Platform (React, Next.js) <https://carketa.com>

- Optimised backend handling millions of vehicle records; high-performance UI with virtualised lists and efficient data-fetching for large datasets.

Frogtummy - Messaging & Finance App (React, Laravel) <https://www.frogtummy.com>

- Real-time messaging & finance system using WebSockets; Laravel backend + React frontend supporting 5,000+ concurrent users.

Young Living Foundation — Donation Platform (Laravel, Vue.js) <https://www.younglivingfoundation.org>

- Developed backend donation workflows, third-party payment integrations, and optimised user flows for a non-profit giving platform.

SYSTEM DESIGN & ARCHITECTURE HIGHLIGHTS

- Designed multi-tenant backend/frontend architecture for scalable SaaS platforms with shared infrastructure and isolated tenant data.
- Designed real-time communication layers using WebSockets and event broadcasting for live messaging and data updates.
- Architected frontend for large-dataset rendering: list virtualisation, memoisation, and optimised re-render strategies.
- Defined backend and frontend coding standards, PR review processes, and technical documentation practices for teams.

EDUCATION & CERTIFICATIONS

- **Master of Computer Application (MCA)** | Pune University | 2013
- **Bachelor of Computer Application (BCA)** | Pune University | 2010
- **Web Expert (HTML5, PHP, CSS3, JS)**: BitCode Technologies | 2014
