

GORAKH SHELKE

Senior Full Stack & React Engineer | React.js, Next.js, TypeScript, Laravel, AWS, Generative AI & RAG Systems

Phone: +91-9096302613 | sachinshelke28@gmail.com | <https://linkedin.com/in/gorakh-shelke-49218096>

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 11+ years of experience building scalable, high-performance SaaS platforms and enterprise web applications. Deep expertise in **React.js, TypeScript, Next.js, Laravel, Node.js, and AWS**. Proven track record architecting multi-tenant platforms powering 150+ production websites for 1,000+ customers, improving API performance by 40-60%, and delivering real-time systems supporting 1,000+ concurrent users. Experienced in **Generative AI integrations, RAG pipelines, CI/CD automation**, and leading engineering teams. Open to **Senior Frontend Engineer and Full Stack Developer (Laravel / Node.js)** roles.

KEY ACHIEVEMENTS

- Architected SaaS platform powering 150+ websites for 1,000+ customers
- Reduced API response time from ~300ms to ~120ms using Laravel Octane
- Improved frontend performance by 40% via code splitting and lazy loading
- Built reusable React component library reducing dev time by 35%
- Engineered real-time systems supporting 1,000+ concurrent users
- Reduced release cycles by 40% through CI/CD pipeline automation
- Boosted backend performance by 35-45% via query and DB optimization
- Integrated REST APIs across 30+ external systems at Aloha Technology

TECHNICAL SKILLS

Frontend: React.js 18, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

State Management: Redux, Redux Toolkit, React Hooks, Context API, React Query (TanStack Query), List Virtualization

Backend: Laravel (Octane, Eloquent ORM, Queues, Events, Artisan), Node.js, REST APIs, GraphQL, WebSockets, Python

Performance: Code Splitting, Lazy Loading, Memoization, Virtualization, SSR, Redis Caching, Imgix CDN, Core Web Vitals

Databases: PostgreSQL, MySQL, MongoDB, Redis

DevOps & Cloud: AWS (EC2, S3, RDS, Route 53, IAM, SES, CloudWatch), Docker, CI/CD, Git, Linux, Vite, Webpack

AI & LLM: Claude API, Gemini API, Groq API, RAG Pipelines, pgvector, Prompt Engineering, LLM Workflow Automation

Testing: Jest, Cypress, Mocha, Unit Testing, E2E Testing

Methods: Agile, Scrum, TDD, Code Reviews, Technical Documentation, Mentoring

CORE EXPERTISE

- Scalable Frontend Architecture (SaaS / Multi-tenant)
- React Performance Optimization and Rendering Strategy
- State Management (Redux Toolkit, React Query)
- Large-scale Data Handling and Virtualization
- Reusable Component Systems and Design Consistency
- Laravel Backend Development and API Design
- AWS Cloud Infrastructure and CI/CD Automation
- Team Mentoring, Code Reviews, Engineering Standards
- Real-time Systems (WebSockets, Event-driven Architecture)
- Generative AI Integration and RAG Pipeline Development

PROFESSIONAL EXPERIENCE

SynerGenie Solutions | Senior Software Engineer - Full Stack | (Laravel + React + AWS) Jan 2020 – Apr 2026

- Architected multi-tenant Laravel platform delivering 150+ production websites to 1,000+ customers
- Implemented Laravel Octane (Swoole), cutting API response time from ~300ms to ~120ms
- Built Redis queue-based async processing (Jobs, Workers, Events, Listeners) to handle high-traffic workflows efficiently
- Optimized Eloquent ORM queries and database indexing, boosting backend performance by 35-45%
- Designed multi-tenant React 18 and TypeScript frontend architecture for core platform and admin interfaces
- Built reusable React component library reducing cross-team development time by 35%

- Integrated GraphQL and REST APIs via React Query for cache-aware, performant data fetching
- Developed real-time WebSocket features (Laravel Echo + Pusher) supporting 1,000+ concurrent users
- Optimized media delivery using Imgix CDN with WebP/AVIF formats, improving page load performance site-wide
- Managed AWS infrastructure including EC2, S3, RDS PostgreSQL, Route 53, IAM, SES, and CloudWatch
- Integrated Stripe and PayPal APIs with robust error handling and webhook verification
- Designed and implemented Generative AI workflows integrating Claude, Gemini, and Groq APIs
- Built production-grade RAG pipelines using Laravel, PostgreSQL, pgvector, embeddings, and semantic vector search
- Automated CI/CD deployment pipelines, reducing release cycles by 40% and eliminating manual deployments
- Mentored 2-3 engineers through code reviews, pair programming, and technical guidance

SynerGenie Solutions | Software Engineer – Full Stack | (Laravel + React.js)

Apr 2016 – Dec 2019

- Developed scalable backend APIs and frontend features for CMS and data-intensive SaaS products using Laravel and React.js
- Migrated legacy JavaScript codebase to React Hooks and TypeScript, improving maintainability and code quality
- Integrated REST APIs across multiple modules ensuring reliable data flow between frontend and backend services
- Collaborated with product and design teams to deliver responsive, user-friendly interfaces meeting accessibility standards
- Contributed to initial CI/CD pipeline configuration and deployment automation

Aloha Technology Pvt Ltd | Software Developer | (Node.js, Express, Mongo, React.js)

Jan 2015 – Mar 2016

- Developed backend APIs and frontend applications using JavaScript (ES6+), Node.js, and MongoDB
- Architected and integrated REST APIs across 30+ external systems for real-time communication platforms
- Strengthened system reliability through structured unit testing and production-ready deployments

KEY PROJECTS

Vahara CMS - Multi-Tenant SaaS & E-Commerce Platform - <https://www.vahara.com>

Tech Stack: React | Laravel | Typescript | PostgreSQL | AWS | Redis | Generative AI | AI-powered page builder

- Built scalable Laravel backend + React frontend powering 150+ websites; dynamic page builder, multi-tenant routing, role-based access control.

CarKeta - Automotive Intelligence Platform - <https://carketa.com>

Tech Stack: React | Next.js | PostgreSQL | Typescript | AWS | AI-powered semantic vehicle search

- Optimised backend handling millions of vehicle records; high-performance UI with virtualised lists and efficient data-fetching for large datasets.

Frogtummy - Messaging & Finance App <https://www.frogtummy.com>

Tech Stack: React | Laravel | PostgreSQL | AWS | Redis | Generative AI | AI-powered email

- Real-time messaging & finance system using WebSockets; Laravel backend + React frontend supporting 1,000+ concurrent users.

Young Living Foundation - Donation Platform - <https://www.younglivingfoundation.org>

Tech Stack: Laravel | Vue.js | HTML5 | CSS3

- Developed backend donation workflows, third-party payment integrations, and optimised user flows for a non-profit giving platform.

EDUCATION & CERTIFICATIONS

- **Master of Computer Application (MCA)** | Pune University | 2013
- **Bachelor of Computer Application (BCA)** | Pune University | 2010
- **Web Expert (HTML5, PHP, CSS3, JS):** BitCode Technologies | 2014
